

MISSION STATEMENT

Dr. Roberta Bondar's Nature Kindergarten Program

Dr. Roberta Bondar's Nature Kindergarten Program offers a safe, supportive and guiding learning experience for young students as they explore their natural world, revel in its wonder, share companionships, and deepen understanding.

Unique and purposeful activities in the outdoors evolve into engaging and meaningful lessons in the classroom that empower youngsters to grow in confidence, skills, appreciation, and knowledge as they become physically robust, emotionally grounded, and academically enlightened.

“The Original Play Station”
